

Dr. Dennis Fera

Dennis W. Fera, M.D. attended Medical School at SUNY, Syracuse, and interned at St. Luke's Hospital in Cleveland. He completed his residency in Rehabilitation Medicine at New York University. To further enhance his range of treatment options and support the body's natural healing processes. Dr. Fera has studied various complementary therapies. These include but are not limited to Nutritional Medicine, Chelation and other Intravenous Therapies, Osteopathic Manipulation, Prolotherapy, and Neural Therapy. Dr. Fera believes that healing is best accomplished when spiritual, emotional, mental, and physical issues are all addressed. "There are many healing arts and philosophies of healing. The most effective treatments are those which address the underlying cause of the problem while taking into consideration the individuality of every patient. My approach is to work in partnership with each patient, utilizing treatments which encourage and support the individual's natural healing process"
